InformaCast Virtual Appliance Basic Paging Release Notes

InformaCast Virtual Appliance Basic Paging version 11.0.2 (InformaCast) is a popular IP broadcasting application for virtualized environments. These release notes document the compatibility requirements, new features, and known/resolved issues in the new version.

Compatibility

InformaCast is compatible with the following versions of Cisco Unified Communications Manager server (including Business Edition 6000): 8.5.1, 8.6.2, 9.0.1, 9.1.2, 10.0.1, 10.5.2, or 11.0.1.

New Features

New Upgrade File. A new file (CiscoPagingServer_11.0.2.deb) has been added to the upgrade process. Depending on the version of InformaCast Virtual Appliance from which you are starting, you will install different package files:

- For 8.3 or 8.4 versions to the current version, you will install three package files (CiscoPagingServer_8.5.1.deb, CiscoPagingServer_9.1.1.deb, and CiscoPagingServer_11.0.2.deb)

- For 8.5.1, 9.0.1, or 9.0.2 to the current version, you will install two package files (CiscoPagingServer_9.1.1.deb and CiscoPagingServer_11.0.2.deb)

- For 9.1.1 or 11.0.1 to the current version, you will install one package file (CiscoPagingServer_11.0.2.deb)

InformaCast Virtual Appliance 8.5.1 and 9.1.1 are waypoints in the upgrade process. For 8.0.2 through 8.4 versions of the Virtual Appliance, you must upgrade to 8.5.1, reboot the Virtual Appliance, upgrade to 9.1.1, reboot the Virtual Appliance, and then continue to upgrade to 11.0.1. For 8.5.1, 9.0.1, or 9.0.2 versions of the Virtual Appliance, you must upgrade to 9.1.1, reboot the Virtual Appliance, and then continue to upgrade to 11.0.1. For the 11.0.1 version of the Virtual Appliance, you can upgrade directly to 11.0.2.

Announcements

The following announcements apply to future releases of InformaCast:

- **Streamlined Support for CUCM.** Releases of InformaCast subsequent to 11.0.2 will not support CUCM 8.5 or 8.6 due to its "end of software maintenance" status with Cisco (see http://www.cisco.com/c/en/us/products/unified-communications/unified-communications-manager-callmanager/eos-eol-notice-listing.html)

- **New Standardized Name.** Coming soon: Cisco Unified Communications Manager will no longer be abbreviated as CUCM and will instead appear as Unified Communications Manager after its first mention as Cisco Unified Communications Manager. This will affect all documentation as well as InformaCast's user interface. Stay tuned.
